The uses of the place

Manger Square is the only large public space in Bethlehem. It is also one of the most important in Palestine, even in the Middle East, in terms of its dimensions. Until recently, this place was in the daytime a large parking space.

The City of Paris is working with the Municipality of Bethlehem to ensure that the Square of the Nativity is more appropriate and better meets the needs of the inhabitants. With the help of the French Development Agency, a new project has been launched : «Reinventing the Manger Square». The objective is to transform the square into a welcoming, comfortable and multi-use public space for all citizens. We wish to give more space for social and cultural life and to strengthen the human scale of the city. The aim is to plan the city for people and especially for pedestrians and not only for cars.

With this drawing, we offer you to use your inhabitant experience. In your opinion, how could we promote pedestrians, the place of women, children, people with reduced mobility, nature in the city or the touristic experience by imagining new activities on the square? Bring your ideas to life on the drawing of the Manger Square.

How do I draw my new Navity square?

1. Print the file :
BETHLEHEM_DRAWING
in landscape format, black and white
2. Imagine and draw new activities for the Navity square of Bethlehem, thinking about the role of vegetation, transports, water, shading ...
3. Color you drawing.
You also can use photographs cut from magazines !
